Diet complexity and L-threonine supplementation: effects on growth performance, immune response, and intestinal integrity in nursery pigs

*Bonjin Koo, Chengbo Yang and Charles Martin Nyachoti
Department of Animal Science, University of Manitoba, Winnipeg, MB*

Bonjin Koo is a Ph.D. student in Animal Science under the supervision of Dr. Martin Nyachoti at the University of Manitoba. He received his M.Sc. from the same university, where he conducted a project on nutritional strategies to save feed costs in nursery pig production, also under the supervision of Dr. Nyachoti. His current study focuses on dietary functional amino acids supplementation to enhance the gut health of nursery pigs. Both his masters and doctoral research are parts of the Swine Cluster 2 and Swine Cluster 3 research projects funded by Swine Innovation Porc. Since beginning his graduate studies, Bonjin has published 13 papers in peer-reviewed journals, either as a lead author or co-author.
